Content & Aim (*Inhalt & Qualifikationsziele*)

This seminar is open to advanced Master students interested in current empirical economic research in the field of social policy and labor markets and to PhD students who specialize in the field of applied microeconomics, in particular, in empirical work striving to identify causal effects (e. g, by applying quasi-experimental methods). The seminar aims to help students to kick-start their first research project respectively first research paper. We offer PhD students a forum to present and discuss their own research project. Students will also be asked to deliver a short discussion of another student's work. Presentation of early stage research projects or research ideas is encouraged. Active participation in all meetings is mandatory. Extensive feedback will be provided on the research project, including recommendations on how to proceed with the research agenda towards their dissertation. The seminar will be also devoted to general questions and tips related to presenting, discussing and writing in economics.
